[LinkedIn](#) | [GitHub](#) | [Dev.to](#)

Flutter Developer with experience building production mobile applications, independently developing ~90% of a live app from development to Play Store release. Skilled in MVVM architecture, state management with Provider, and integrating features like authentication, payments, and notifications, with additional experience developing supporting backend APIs using Golang.

PROFESSIONAL EXPERIENCE

MeritHub Technologies, Mohali — Software Developer

Feb 2023 – Present (Full-time since June 2023)

- Led development of a production-grade Flutter application, independently implementing ~90% of the codebase from initial development to Play Store release.
- Designed application architecture using a feature-first MVVM architecture with Provider for scalable state management.
- Managed 30+ production releases and 50+ internal builds, handling versioning, testing tracks, and deployment via Google Play Console.
- Developed RESTful APIs in Golang and integrated core features including SSO, deep linking, Firebase notifications, Razorpay, and Twilio (WhatsApp API).
- Improved application stability and performance by optimizing state management, reducing unnecessary widget rebuilds, implementing caching, and strengthening error handling.

Indian Institute of Technology, Mandi — Python Developer Intern

Aug 2022 – Oct 2022

- Developed control logic for an automated chess-playing robot using Python and Raspberry Pi.
- Designed movement mechanisms and implemented coordinate-based positioning for precise robotic actions.

EDUCATION

Atal Bihari Vajpayee Govt. Institute of Engineering & Technology, Shimla

B. Tech in Electronics and Communication Engineering | 2019 – 2023 | **GPA: 8.01**

PROJECTS

Balancio — Expense Tracker | GitHub | Play Store

- Built and deployed a Flutter expense tracking app using Firebase (Auth + Firestore) with MVVM architecture.
- Implemented expense tracking, categorization, and summaries with cloud-based data storage and cross-device access.

Micro Diary — Macro Tracker | GitHub

- Developing a Flutter macro tracking app using Riverpod and clean architecture.
- Integrated USDA Food Data API and implemented offline-first storage using Isar database.

SKILLS

Languages: Dart, Golang, Python, JavaScript

Frameworks & Tools: Flutter, Firebase (Auth, Firestore, Messaging), Git, Postman, Google Play Console

Architecture & State Management: MVVM, Clean Architecture, Provider, Riverpod

Backend & APIs: RESTful APIs, fasthttp, Razorpay, Twilio (WhatsApp API)

Databases & Storage: Firestore, RocksDB, Isar
